

DIKEH DANIEL K.

Frontend Developer

dikehdaniel2020@gmail.com | Portfolio | GitHub

TECHNICAL SKILLS

Languages

HTML5 · CSS3
JavaScript (ES6+)
TypeScript

Frameworks & Libraries

React.js
Next.js
Tailwind CSS · Bootstrap
VexFlow

Tools

Git · GitHub
VS Code · npm
Vercel · Netlify
Supabase
Chrome DevTools

Core Strengths

Responsive UI design
Component architecture
State management
Performance optimization

EDUCATION

B.Sc. Microbiology

Nnamdi Azikiwe University
Anambra, Nigeria

STRENGTHS

Strong problem-solving
& debugging skills
Fast learner with new
technologies
Good UI/UX principles
Effective collaboration
& communication

PROFESSIONAL SUMMARY

Creative and detail-oriented Frontend Developer with experience building responsive, interactive web applications using React, TypeScript, and Tailwind CSS. Focused on crafting clean UI systems, scalable component architecture, and smooth user experiences. Currently building a music notation platform (FaithScore) and a choir-focused content sharing platform (FaithLibrary). Passionate about solving complex frontend problems and continuously improving engineering quality.

PROJECTS

FaithScore Music Notation Web App [Live App](#)

- Developing a professional-grade web-based music notation editor inspired by MuseScore.
- Built with React, TypeScript, Tailwind CSS, and VexFlow for real-time music rendering.
- Implementing advanced features: note input, beams, ties, slurs, multiple clefs, and interactive playback.
- Focused on accurate engraving logic, responsive UI, and scalable architecture.

FaithLibrary Choir Content Sharing Platform [GitHub](#) | [Live App](#)

- Built a web app for uploading, downloading, and sharing choir scripts and musical arrangements.
- Designed a multi-page responsive UI with React supporting structured organization of choir materials.
- Developed reusable components for content rendering, navigation, and layout consistency.
- Focused on performance, readability, and seamless UX for choir communities.

Furniture Web App E-commerce Catalog [Live App](#)

- Built a responsive furniture catalog with filtering, search, and interactive product modals.
- Implemented reusable React components with clean, maintainable state management.
- Designed a mobile-first UI using Tailwind CSS for a smooth user experience.

Interactive Portfolio Website [Live App](#)

- Designed and developed a fully responsive personal portfolio site.
- Built with HTML, CSS, JavaScript, CSS Grid, and Flexbox.
- Optimized for performance and mobile responsiveness.
